

Recording meeting presentations with OBS

KRATOS®

1. OBS INSTALLATION

Please proceed to the next step if you have already installed the OBS software.

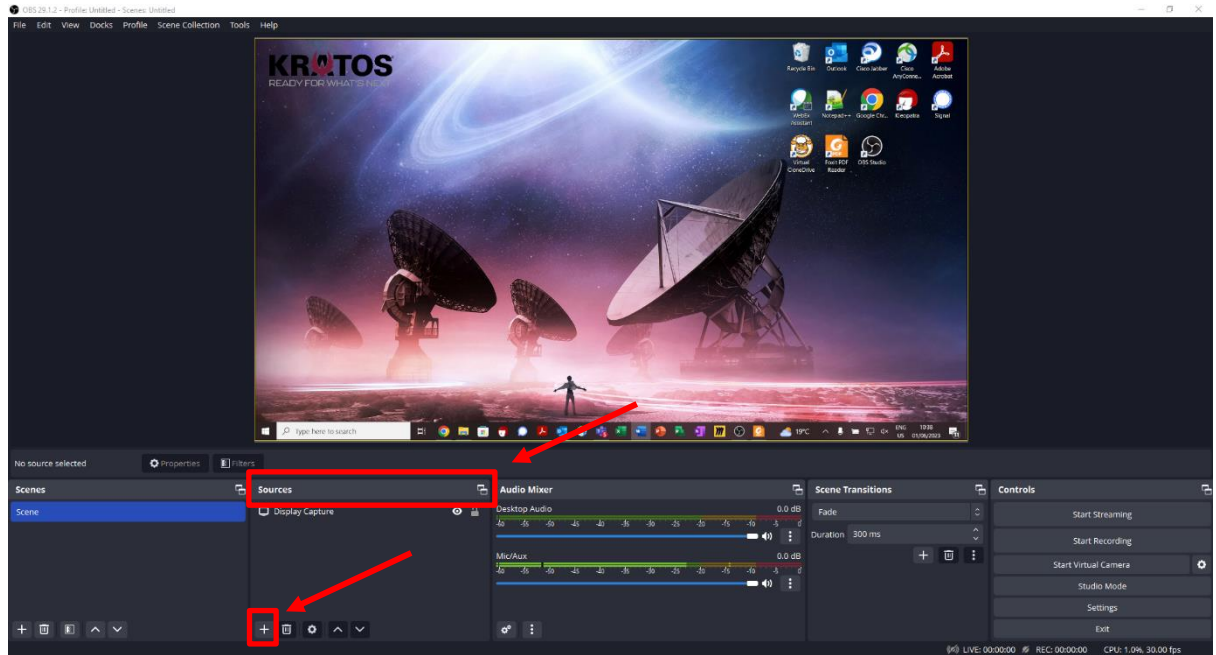

- 1) Go to the OBS Studio webpage: <https://obsproject.com/fr/download>
- 2) Download OBS Studio for Windows.
- 3) If you are the admin of your PC, please enter your login details and follow the download steps.
If you are not the admin of your pc, please contact the IT.
- 4) The OBS Studio software is now installed on your PC.

2. HOW TO RECORD A MEETING PRESENTATION WITH OBS?

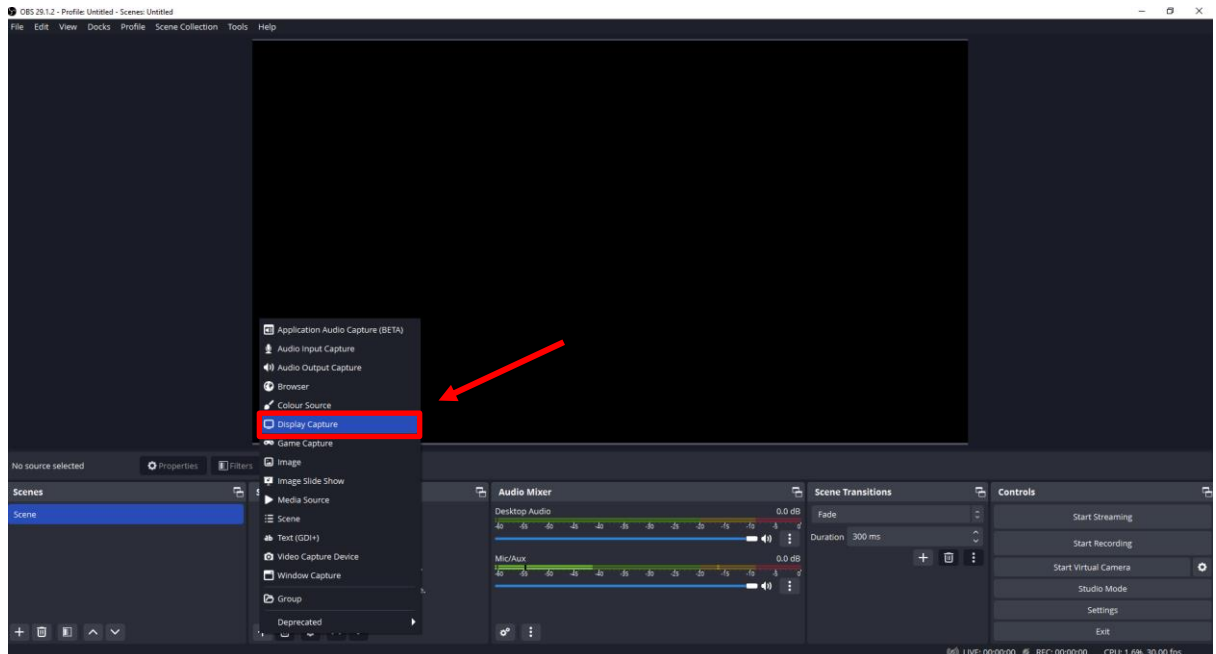

1) Open OBS Studio:

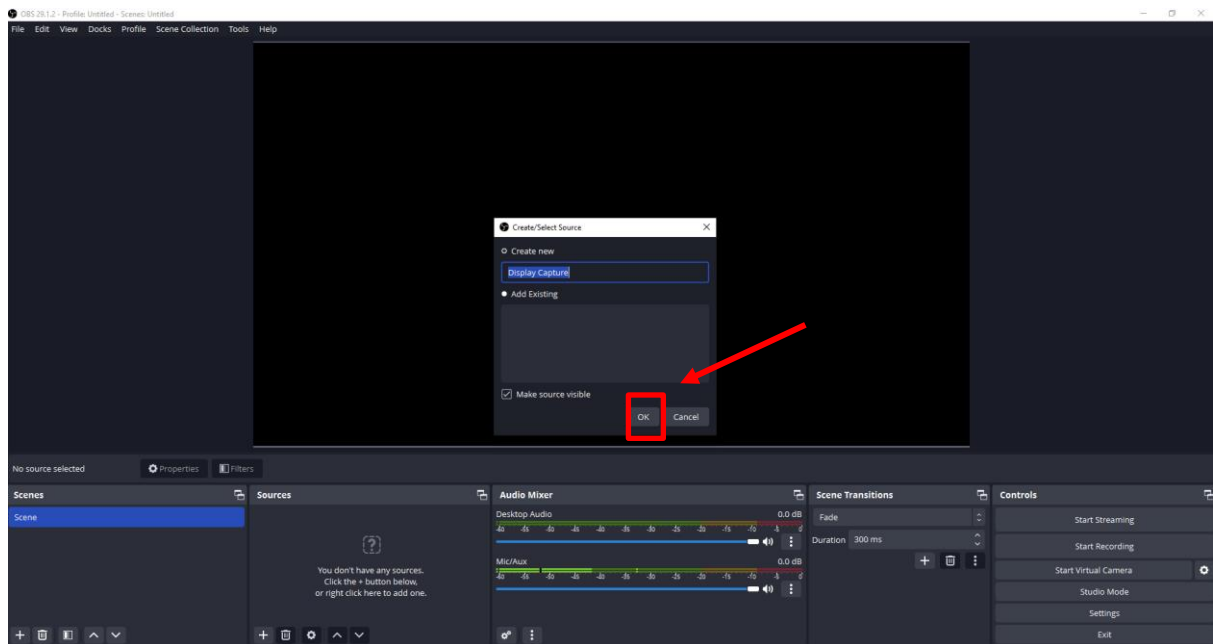

2) Click on source and then on the button “+” :

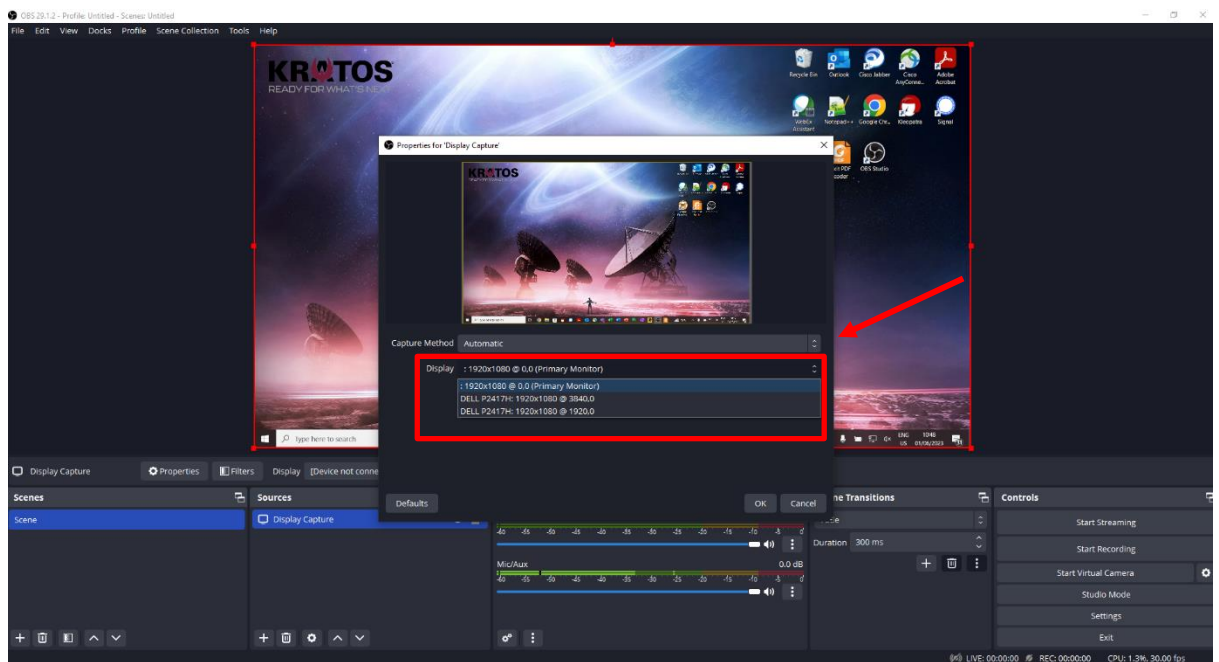

3) A drop-down list appears. Click on “Display Capture”:

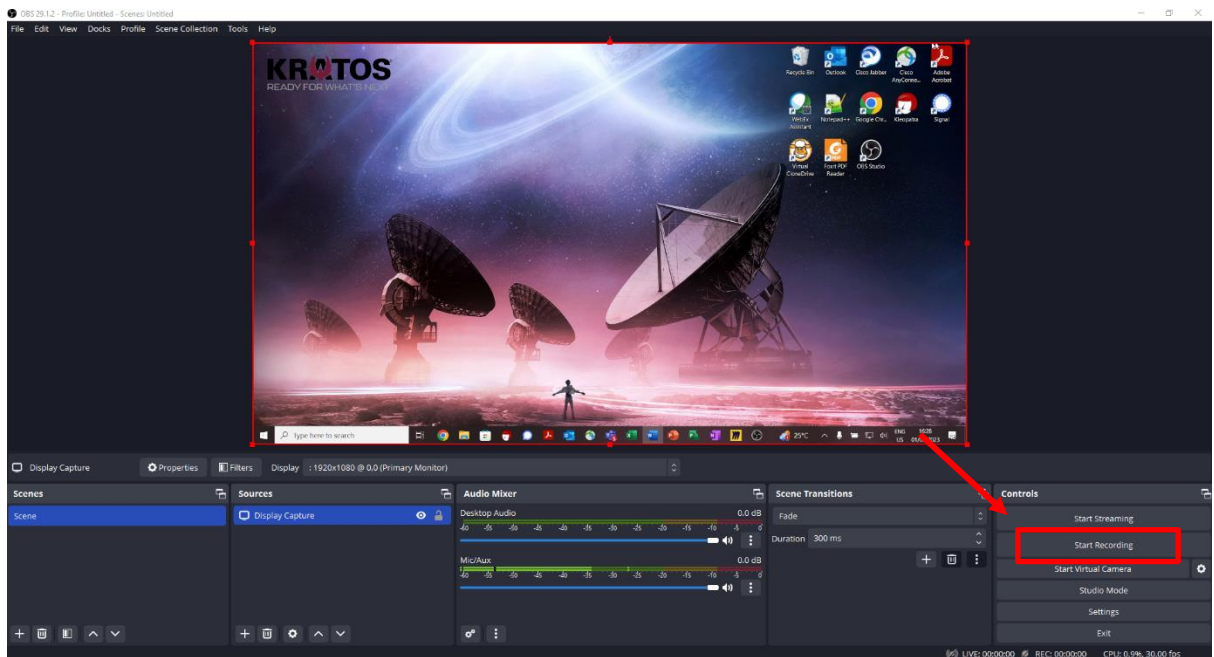

4) Click on “OK”:

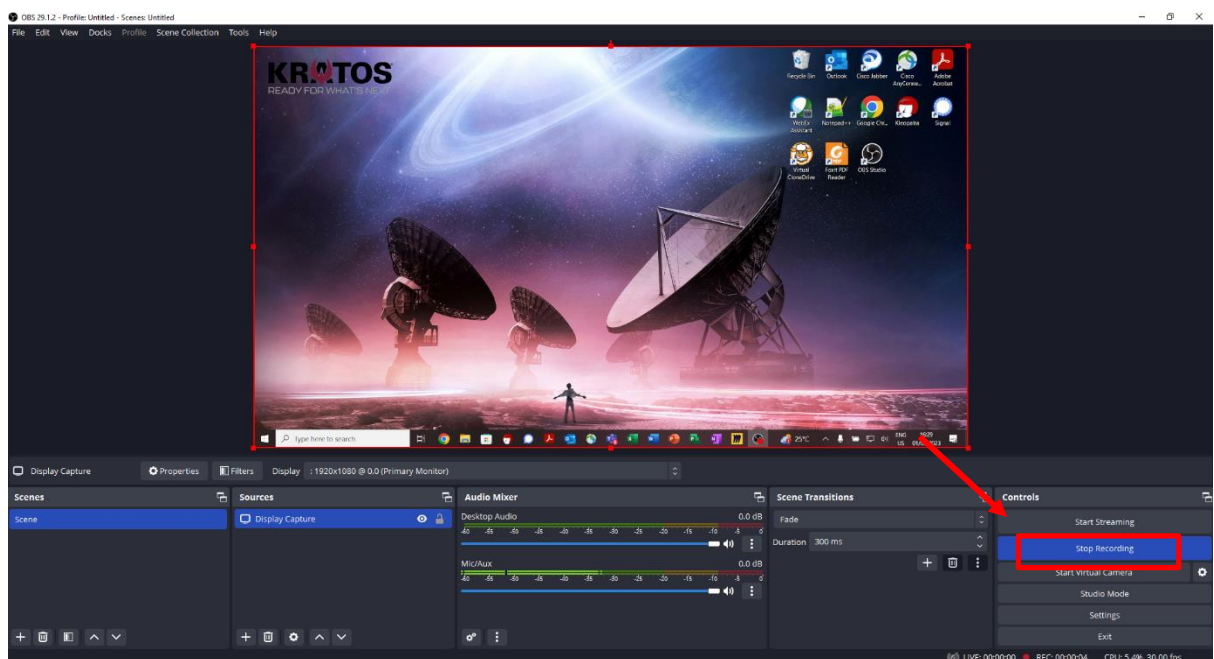

5) Select the display you want to record:

6) Click on “Start Recording”:

7) To stop recording, click on “Stop Recording”:

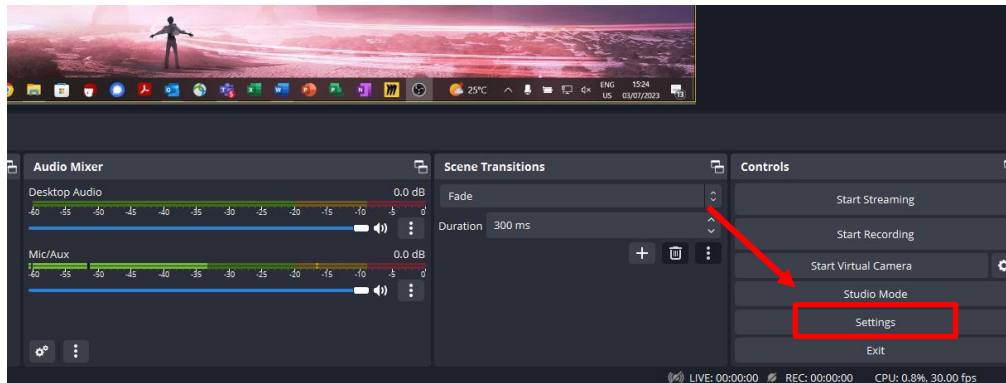

8) The recorded presentation is now in your video folder on your PC.

9) Please add the recording of your presentation to the common folder in Shackleton:
<\\shackleton\\common\\Training>
If you are a consultant and don't have access to the Common folder, ask a Kratos employee to add it.

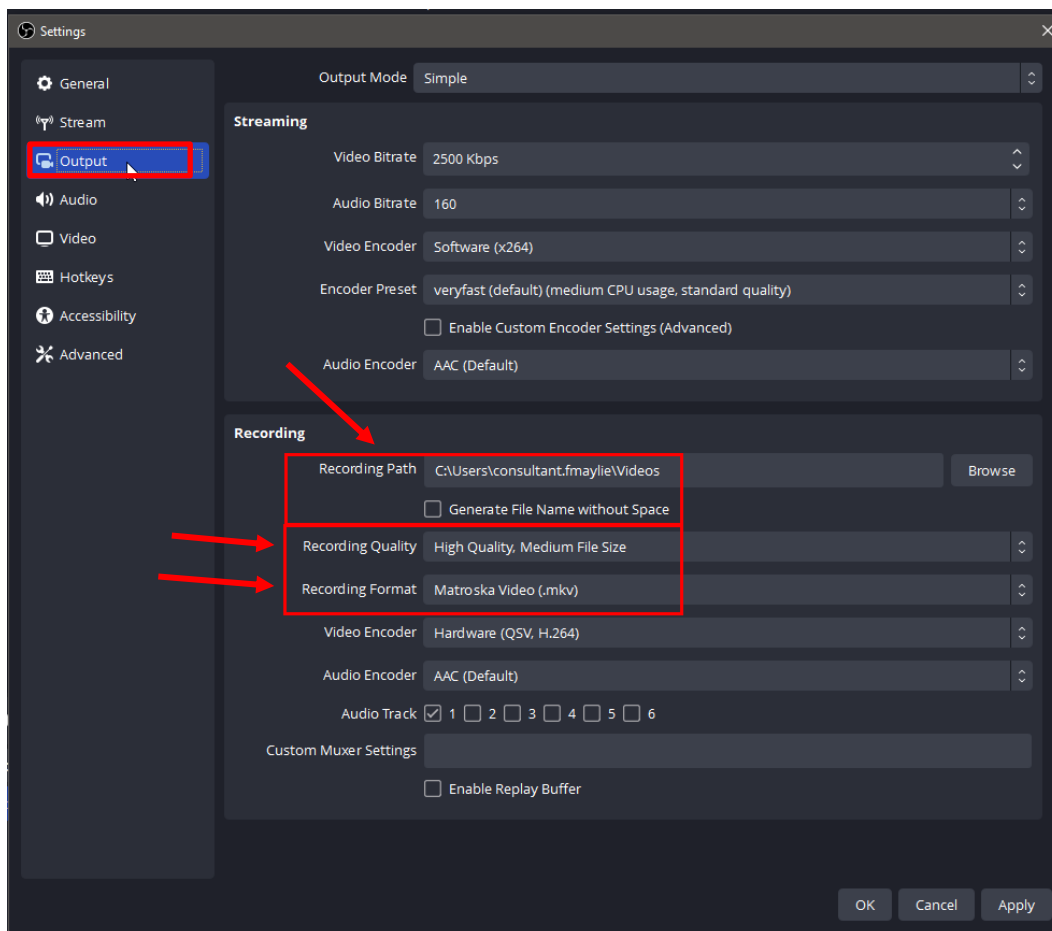

3. CUSTOMIZE YOUR SETTINGS

Go to settings:

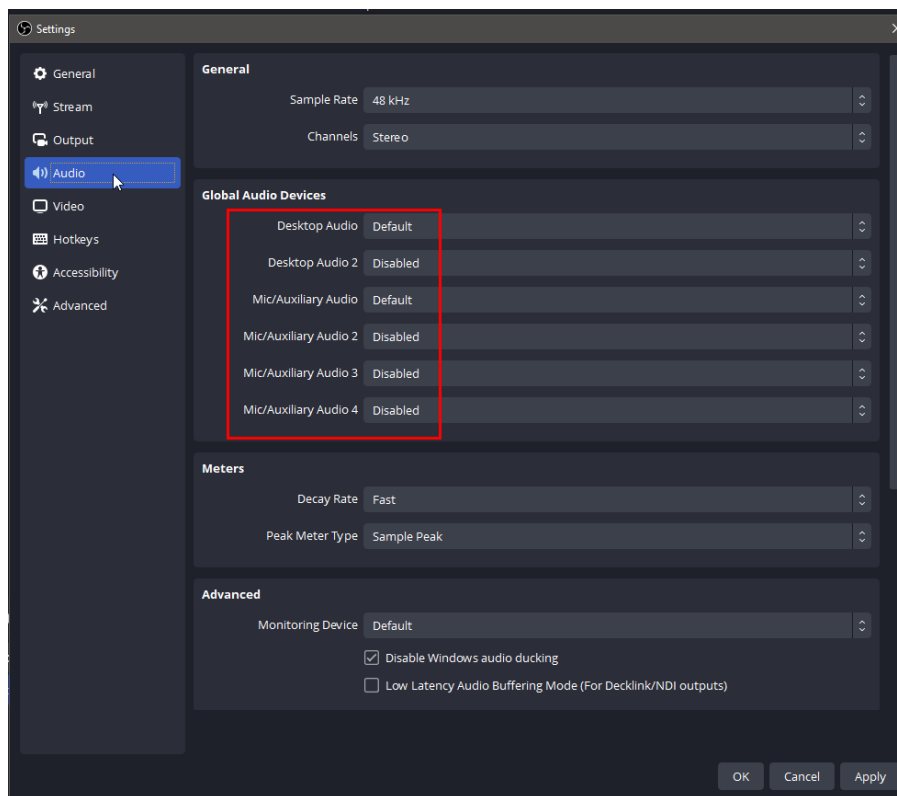

3.1 OUTPUT SECTION

In this section, you can customize your recording path, recording quality or even recording format:

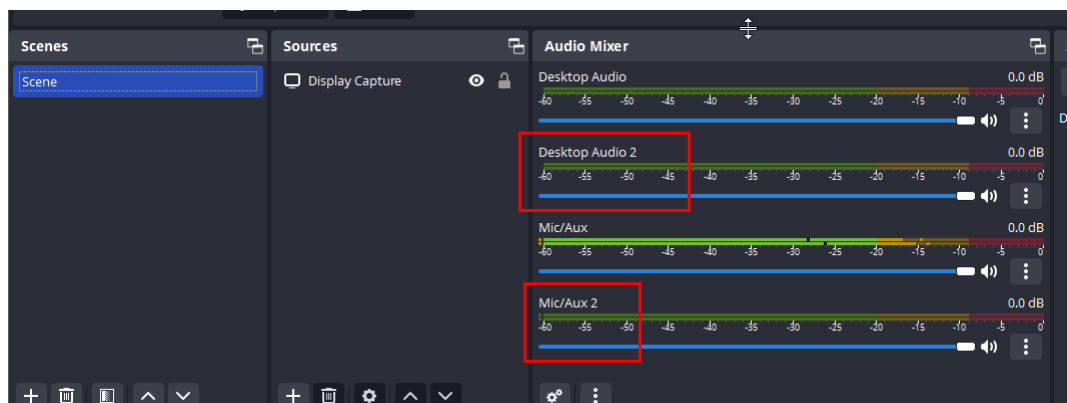

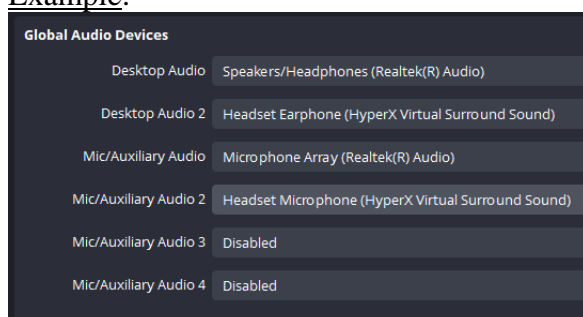

3.2 AUDIO SECTION

In this section, you can configure the speakers and microphones that will be recorded.

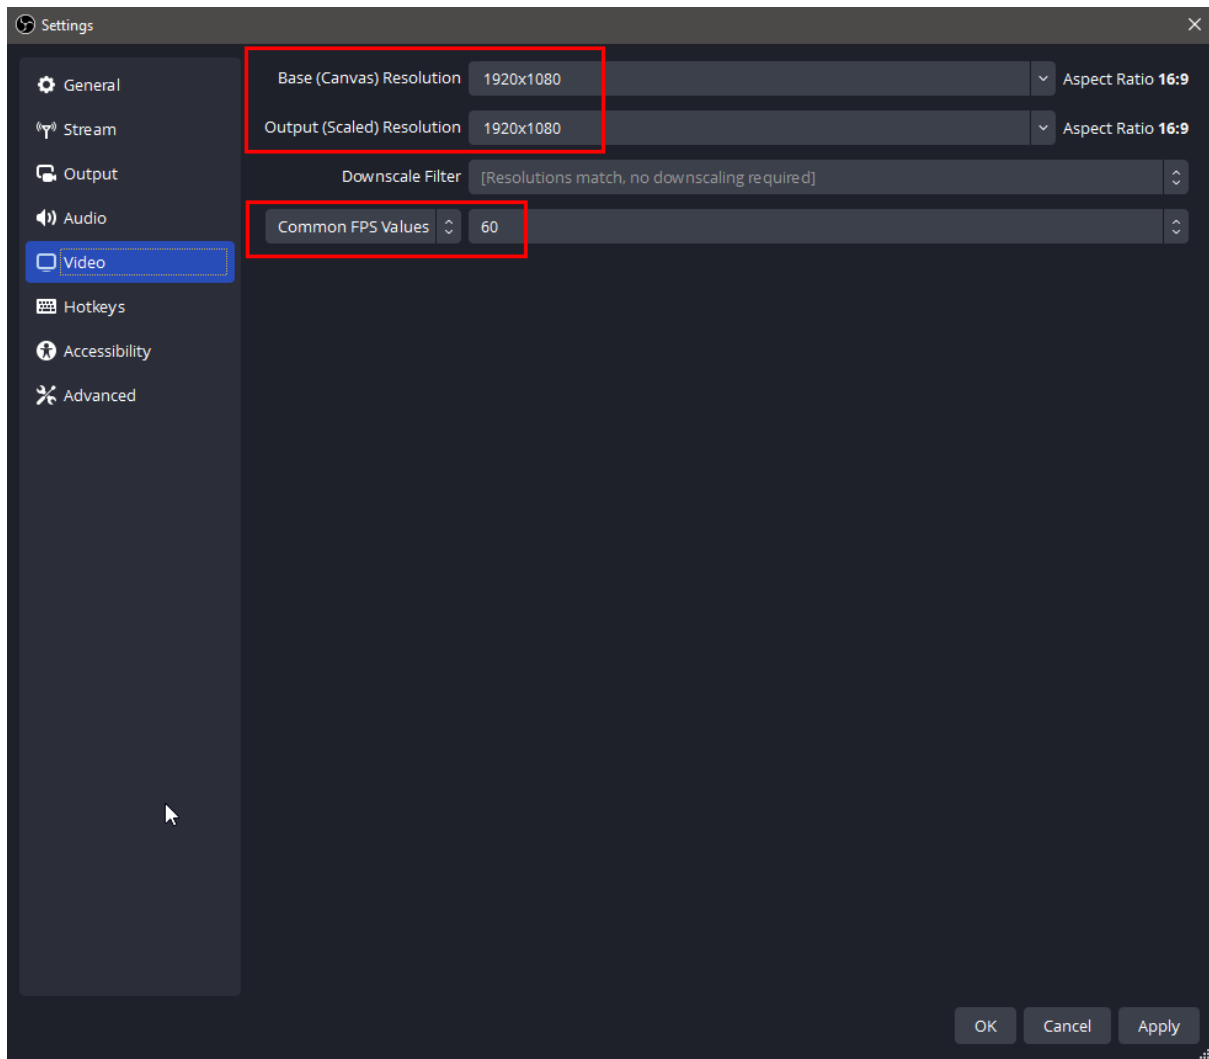

Please note that if you add more than one microphone and speaker, remember to check that they appear in the sources.

Example:

3.3 VIDEO SECTION

In this section, you can configure the resolution of the video and the FPS.

Warning: Make sure you have the same aspect ratio between the base resolution and the output resolution (16:9).
